

# Supportive Recovery Program

**Do you want to reduce your drug use? Want to slow down your drinking?**

**Need to get back on track at school?**

**Need support to build a healthier relationship at home?**

Our program provides an opportunity for you to consider your relationship with substances while you live in a safe supportive environment with people who care about youth.

It is a voluntary program and you set your goals.

A support worker is there to assist you in achieving them.

As long as you are choosing to reduce your substance use, the Supportive Recovery Program may be an option for you.
